

NUMAAN OPAI

Data Science & Analytics | Machine Learning

+91 8390963603 | numaan.y.opai@gmail.com | linkedin.com/in/numaan-yunus-opai | github.com/numaaannn | Nagpur, Maharashtra

SUMMARY

MCA (AI & ML) graduate with a strong foundation in Python, SQL, and machine learning. Experienced in data preprocessing, EDA, and statistical analysis for real-world datasets. Eager to contribute as an entry-level Data Scientist or ML Engineer.

EDUCATION

Ramdeobaba University, Nagpur — Master of Computer Applications (AI & ML) 2026 | CGPA: 7.66

Tirpude College, Nagpur — B.Com in Computer Application 2023 | CGPA: 7.87

SKILLS

Programming Languages: Python

Data Science Tools: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

Machine Learning: Supervised Learning, Unsupervised Learning, Data Preprocessing, Feature Engineering, Model Training, Model Evaluation, Statistical Analysis

Deep Learning: TensorFlow, Keras, Neural Networks

Databases: SQL

Tools: Google Colab, Jupyter Notebook, Streamlit, Git, GitHub

Web Development: React.js, Tailwind CSS, REST APIs, JSON

EXPERIENCE

Data Science Apprenticeship | Vigo Technoworld Pvt. Ltd. March 2026 – August 2026

- Learned the end-to-end data science workflow — cleaning raw customer transaction data, running statistical analysis, and extracting insights with SQL and Python (Pandas, NumPy).
- Gained hands-on experience with unsupervised learning by building a K-Means model to segment customers into 6 behavior-based groups.
- Understood how dimensionality reduction (PCA) improves model interpretability and visualization on real-world, high-dimensional data.

Web Development Intern | Smart Software Solutions February 2025 – August 2025

- Built 8-10 responsive UI components with React, JavaScript, and Tailwind CSS, and integrated REST APIs to connect frontend and backend.
- Learned frontend performance optimization and collaborative development using Git/GitHub in a team setting.

PROJECTS

Customer Segmentation & Recommendation System | [Live Demo](#)

K-Means, PCA, Pandas, NumPy, Scikit-learn, Streamlit

- Segmented customers into 6 clusters using K-Means (Elbow Method) and PCA, based on EDA across 10-12 attributes.
- Deployed as an interactive Streamlit app for real-time segment exploration.

Jewellery Store Website with AI Chatbot | [Live Demo](#)

React.js, JavaScript, Tailwind CSS, LLM APIs, NLP, Vercel

- Built a responsive e-commerce site with an AI chatbot (5-6 prompt templates) for product, pricing, and shipping queries.
- Deployed on Vercel with GitHub-integrated updates.

Personal Portfolio Website | [Live Demo](#)

React.js, Tailwind CSS, Vercel

- Responsive portfolio with reusable components, showcasing projects and certifications; deployed on Vercel.

CERTIFICATIONS

- Deep Learning with Keras and TensorFlow — IBM (April 2026)
- The Nuts and Bolts of Machine Learning — Google (April 2026)
- Introduction to Deep Learning & Neural Networks with Keras — IBM (March 2026)
- Python Programming Essentials — Rice University (May 2025)
- Developing Front-End Applications with React — IBM (November 2025)
- React Basics — Meta (October 2025)
